Service features

Assurance

Trouble ticketing resolution time within
8 working hours.

Who the service is for

The services are for all operators wishing to include value-added and low-cost services in their connectivity offers.

Description of the Kaspersky Small Office Security service

The protection of a company's terminals requires continuous protection.

Kaspersky Small Office Security (KSOS) is designed for **innovative** businesses, which need to **manage** security **independently** and without initial investment (CAPEX) also for **a large number of devices (mobile and fixed, virtual and non-virtual servers)**. **In particular with KSOS you can manage up to 50** company devices: Windows and Mac desktops, Windows File Servers, Tablets and Android Smartphones. The solution is **pre-configured** and easy to manage with a cloud console, requires no IT management skills and allows monitoring from any connected device.

What the service offers

Antivirus and Antimalware

KSOS is designed to easily and comprehensively manage the protection of devices and applications during IT and Cloud Transformation, offering the tools and IT resources needed to independently secure your device and data assets from computer viruses, malware and cryptolockers.

Functionality

Defence against cryptographic malware with Anti-cryptor functionality. It can also block unknown malware before it is executed and files are backed up before the threat can modify or encrypt them.

Creates virtual safes (containers) in which files and folders can be securely encrypted and stored. Protection against data loss and cryptolockers is achieved through automated backup and recovery procedures.

Kaspersky Small Office Security

Autonomous management of own resources

It also offers the possibility to increase or decrease resources autonomously according to your needs.

Web Console accessible anytime, anywhere

Resources available and configurable at any time and from any device via Web console.

Kaspersky's cloud-based console makes it easy to remotely manage and monitor the protection status of your devices. The Kaspersky web console offers:

- Centralised display of all devices
- Immediate display of device protection status
- Remote management of security settings
- Simplified licence management

Convenience

Multiple profiles with different dimensions make it easy to map the company's needs.

Strengths

TOP Player

Kaspersky confirms its position as one of the TOP players in the security market every year with cutting-edge, visionary solutions. (Gartner Magic Quadrant 2019).
