

## Wholesale Market

## White Label Hosting

A Windows server in the cloud from  
25 euros/month

# White Label Hosting

White Label Hosting is an advanced virtual machine service that provides a virtual machine (including Windows) for an all-inclusive monthly price.

## Service features

Assurance

Trouble ticket resolution time within

**8 hr working time.**

## Who is it for?

The service for all Operators who manage company data assets on their own behalf or that of their customers and want to facilitate the Cloudification process by migrating to the servers of TIM Data Centres located in Italy.

## Description of the service

The **White Label Hosting** service is an infrastructure service provided by the TIM Wholesale Cloud platform, which enables OLO/ISP customers to offer their customers virtual private servers in white label mode, with various possible configurations that can be upgraded flexibly and easily, also in self-service mode.

End-customers **access their servers through the public internet and have a variety of tools at their disposal to make all server activities quick and easy.**

## **VIRTUAL PRIVATE CLOUD SERVER**

A Virtual Private Server allows you to go beyond simple web shared hosting, offering the end customer dedicated resources and considerable customisation potential. In this way, you can, with exceptional performance, host multiple sites, blogs and many types of simple web applications, and set up email servers.

The OLO ISP has the option to provide its end-customers with virtual servers in 'naked' mode, but with a series of tools and instruments to assist in creating websites or web applications.

From the TIM Wholesale Cloud automation platform

The end customer can acquire their own dedicated servers in self-service mode directly via the web

and, once the server has been acquired and the sites and / or applications have been completed, the latter are immediately usable on the big internet in a high-performance manner through dedicated Public IPs.

# White Label Hosting

Alternatively, the OLO ISP can exploit these servers to offer further added value to its end customers by providing a 'dressed up' service, in other words by using the servers to build websites or some type of web application on behalf of its customers.

**All this is possible** for the TIM Wholesale customer **without any initial investment**, only paying for the resources used.

## TARGET AUDIENCE

With the **White Label Hosting** service, OLOs/ISPs provide small and medium-sized enterprises, local/central public administrations, bodies, ICT service providers, with the tools to improve their web presence or in general to exploit the potential of the web to improve and grow their business.

## Regulatory conditions

The service is exclusively for:

- Operators with an individual license or a general authorisation for telecommunications networks and services for public use which existed before the entry into force of Italian Legislative Decree no. 259 of 1 August 2003, containing the 'Electronic Communications Code' (referred to in Article 38 of the Code), as last amended by Italian Legislative Decree no. 70 of 28 May 2012.
- Companies with a general authorisation for electronic communications networks and services pursuant to Art. 25 of Italian Legislative Decree no. 259 of 1 August 2003, as last amended by Italian Legislative Decree no. 70 of 28 May 2012.

## Buy your service online!

**If you want to buy the service for yourself or become a reseller:**

- access the [WholesaleDigitalStore](#) site
- fill in the [form online](#)

**If you are already our customer**, you can easily purchase the service by accessing the Wholesale Cloud Automation platform.
