# Easy IP ADSL

With the Easy IP ADSL service, you can give your customers broadband Internet access thanks to the widespread nature of the TIM network.

## Service features

### ADSL accesses

Downstream up to  
20 Mbit/s

Upstream up to  
1 Mbit/s

## Who is it for?

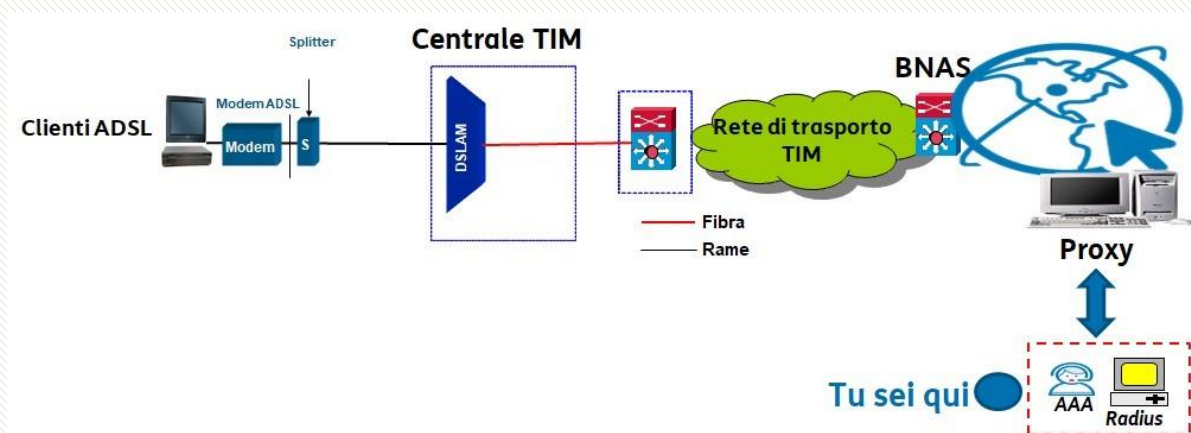

Easy IP ADSL is the ideal solution if:

- you are a new operator (ISP) entering the market;
- you are a wireless network operator (WISP) wanting to complete its coverage.

## Description of the service

The Easy IP ADSL service allows you to provide your customers with full broadband Internet services: the solution is based on the integration of the ADSL access component and the IP bandwidth provided by TIM through its own national and international network.

When you purchase Easy IP ADSL, you retain full commercial management (billing) of your customers, and manage the Authentication, Authorisation, Accounting (AAA) functionality on your Radius server. You can complete your customer offer with services such as email, domains, security services and others.

# Easy IP ADSL

Easy IP ADSL means 'turnkey' broadband: all you have to do is ask us for access for your customers and handle their authentication. TIM will put them online!

## What else should you know

To use EASY IP ADSL you only need a Radius server with a static public IP accessible from the Internet, which manages the authentication, authorisation and accounting of your customers

## Getting Started

After signing the contract, you must:

Test the initial configuration for the dialogue between the Telecom Italia Proxy and your Radius server;

ask us to activate ADSL access from your customers' premises. You can ask us either to create a new line or create a 'migration', a passage of the Customer from another Operator (OAO).

*It couldn't be more "Easy"...*

## Prices

A one-off contribution and a monthly fee are paid for each broadband access including Internet browsing.

For more information, please contact the Wholesale Account Manager.

## Regulatory conditions

The service is for:

- Operators with an individual license or a general authorisation for telecommunications networks and services for public use which existed before the entry into force of Italian Legislative Decree no. 259 of 1 August, 2003, containing the "Electronic Communications Code" (referred to in Article 38 of the Code), as last amended by Italian Legislative Decree no. 259 of 28 May, 2012. 70.
- Companies with a general authorisation for electronic communications networks and services pursuant to Art. 25 of Italian Legislative Decree no. 259 of 1 August 2003, as last amended by Italian Legislative Decree no. 70 of 28 May 2012.
