**Semi-Easy IP NGA**

Like Easy IP NGA but with the advantage of FiberCop co-investment

# Semi-Easy IP NGA

With Semi-Easy IP NGA you can offer Easy IP NGA FTTH, with the cost advantages of FiberCop co-investment.

## Service characteristics

### FTTH accesses

DOWNSTREAM  
**1 Gbit/s**

UPSTREAM  
**100 Mbit/s or 300 Mbit/s**

## Who is it for?

Semi-Easy IP NGA is the ideal solution if:

- you already use Easy IP NGA
- you have participated in the co-investment with FiberCop project
- you want to provide Internet access in municipalities involved in co-investment at competitive prices

## Preliminary services

- Co-investment contract with [FiberCop](#) (Semi-GPON with guaranteed minimum)
- [Easy IP NGA](#)

## Description of the Semi-Easy IP NGA service

The Semi-Easy IP NGA service provides your customers with full ultra-broadband Internet browsing services: the solution is based on the integration of FTTH accesses you have coinvested in and the IP bandwidth provided by Telecom Italia through its national and international network.

To receive the Semi-Easy IP NGA service, you must therefore:

- activate the Easy IP NGA service;
- have participated in the Co-investment with FiberCop project (Semi-GPON service with guaranteed minimum) to use passive connections on the secondary fibre optic network, from the end customer site up to the FiberCop optical cabinets (CRO/CNO).

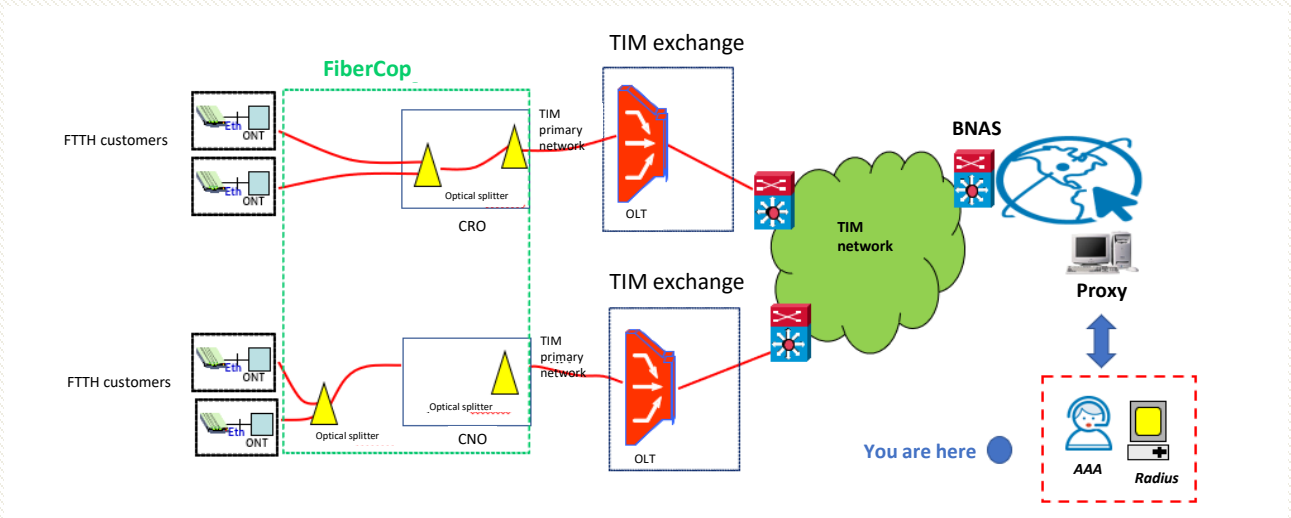

TIM will be responsible for End to End management of the supply and support processes, invoicing and SLAs/penalties (also for the components that FiberCop is responsible for).

For more information, go to [www.wholesale.telecomitalia.com](http://www.wholesale.telecomitalia.com)

# SEMI-EASY IP NGA

When you purchase the Semi-Easy IP NGA service, you maintain full commercial management (billing) of your customers and you also independently manage Authentication, Authorization, Accounting (AAA) on your Radius server. You can complete your customer offer with services such as email, domains, security services, etc.

Semi-Easy IP NGA means ‘turnkey’ ultra-broadband: all you have to do is ask us for access for your customers and handle their authentication. TIM will put them online!

## Getting started

You must have:

- signed the Easy IP NGA contract;
- signed the Co-investment with FiberCop contract.

You can ask us to supply a new Semi-Easy IP NGA line or effect a “migration”, i.e. the customer is transferred from another Operator (OAO).

If you are not already one of our customers, you can go to the section [How to become a customer](#) on the Wholesale portal and complete the form. One of our Commercial Team will contact you as soon as possible!

## What else you need to know

The Radius Server for managing AAA can be the same one you already use for Easy IP NGA customers.

For more information, go to [www.wholesale.telecomitalia.com](http://www.wholesale.telecomitalia.com)

## Regulatory conditions

The service is for:

- Operators with an individual licence or general authorisation for telecommunications networks and services for public use which existed before the entry into force of Italian Legislative Decree no. 259 of 1 August, 2003, containing the 'Electronic Communications Code' (referred to in Article 38 of the Code), as last amended by Italian Legislative Decree no. 70 of 28 May 2012;
- Companies with a general authorisation for electronic communications networks and services pursuant to Art. 25 of Italian Legislative Decree no. 259 of 1 August 2003, as last amended by Italian Legislative Decree no. 70 of 28 May 2012.
